Element22 announced as a CDMC authorized partner by EDM Council

NEW YORK – Today, global cross-industry association for data management and analytics, EDM Council, announces the launch of the Cloud Data Management Capabilities (CDMC) Authorized Partner Program (CAP) – a support program for companies that wish to engage in an independent assessment or certification of their cloud data management capabilities. Professionals from the CAP partner firms are trained and certified by the EDM Council, and are licensed to deliver CDMC-based assessments and certifications.

Predrag Dizdarevic, Partner at Element22, said: “We are pleased to be an inaugural CDMC Authorized Partner. As cloud adoption continues to accelerate within the financial services industry, it is paramount to have strong and reliable cloud data management capabilities. With this program and the ability to use CDMC in our advisory engagements, we will be in a position to service our clients even better.”
